

I Just Wanna Believe

Pablo Cruise

I just wanna believe
In what you say
I just wanna believe
Oooh

In these times when everything is moving way too fast
I know its hard to feel like anything, anything at all with las
t
But with you by my side I feel like there's a chance

I just wanna believe
I just wanna believe
I just wanna believe
I just wanna believe

And when you kiss me darling, I feel so warm inside
And give me some kind of desperation
And your soul some kind of pride
And just knowing that your in this world,
Makes that something come alive

I just wanna believe
In what you say
I just wanna believe
In what you say

All of us want to believe
I just wanna believe
I just wanna believe
I just wanna believe
