

# Winter Of Disembowelment

Paganizer

Winter has come  
the winter of our end  
the snow stained red  
by eviscerated humans

A massive upheaval  
of the raped dying earth  
every catastrophe  
has come to be

The winter of  
disembowelment  
the earth anew, and now content

The winter of  
human death  
humanitys last gasping breath

The ground now opens to swallow  
cities and entire continents  
the world covered in corpses  
humanity cast down in hell
