

Let's build something
We can call our own
These conversations on the telephone
Cause I'm rarely home
Endlessly in flight
Left you alone with a water bottle and no dice (I'll stay)

Let's settle down
Let's normalise (bombs away)
Let's dance around on a mushroom high (don't change)
Cause I'm there for you
When the thoughts inside my head (Don't fade)
And I'm there for you
I'll love you till I'm dead

We'll bleach our hair together
And I'll hold you tight forever
You anchor me to a different life
Found somebody to make it right
We'll reach for something better
And we'll gaze at stars for pleasure
Then you said the moon was fire
Then you said the moon was fire

(Lemon drops)
Let's build a home
Let's run away (hilltops)
Let's live our lives
In a distant place

My head and body are so ready to collide with you
I had nobody and now I have nearly killed the blues
I won't let you down my love
You set the fire in my heart
I lost the dice but realised that I'm alive by your side
You can wear my blue coat cause you know you will
You can wear my blue coat cause I know we're real

We'll bleach our hair together
And I'll hold you tight forever
You anchor me to a different life
Found somebody to make it right
We'll reach for something better
And we'll gaze at stars for pleasure
Then you said the moon was fire
Then you said the moon was fire

I was it all my fault
Never said It was perfect
Never said it was worth it
And I am all teeth for you
I'll hold my breath till I'm blue
You're just a piece of my truth
