

Red

Pale Waves

We sit side by side
I wanna know what you feel like
Tell me what you feel like
You haven't left my mind
Trust me that I've tried and I've tried, I've tried
At the hotel I met you for a drink
And after two or three you were all over me, all over me
Oh and I know red's your favourite colour
And we sat in the same place doing impressions of eachother

Oh no, baby are gonna make it this time?
I always take hearts that shouldn't be mine
Slow down baby, are we gonna make it alive?
You've got a face that I always recognise
Always recognise

And you laughed at my crooked teeth
But said that they suited me
You pay attention to everything
And I know that your friends would say
Oh, it doesn't matter they're all in love with me anyway

Oh and I know red's your favourite colour
