

Beside You

Papas Fritas

Don't lie when I ask how you're feeling
I can read your mind
Second thoughts have come across so clear
In your eyes

Outside, in the car, in the kitchen
There's nothing left to say
Eternity gets a little shorter everyday

And for a while
We couldn't pretend
But no denial
Could start things over again

The road goes on forever
The days fade into the night
We're not walking together
And now I'm feeling alright

Forget all the things that I told you
Whispers in the dark
It's all in vain
'cause everything we had just fell apart

Three weeks seems so long when there's nothing to do
Lookin' up at the sky and it's finally blue
High time I threw away that shoebox full of thoughts of you

Try not to rewind
To the first time
Like it's sometime yesterday
Draw the blinds
Let the sunshine find a way

The road goes on forever
The days fade into the night
We're not walking together
And now I'm feeling alright

So the party's over
It's time to move it along
So don't look over you're shoulder
Cause I'll already be gone

And for a while
We couldn't pretend
but no denial
Could start things over again

And I'll be gone
And I'll be gone
And I'll be gone
And I'll be gone
