

One Chance

Parabelle

I might be temporary
But my old heart beats for something
I either hate it or I'm afraid of it
It floats and lies straight up to the sky
But they get caught in my head
And that's when she said

I won't be safe for long
Don't let me forfeit

What's wrong and what goes on inside this
There's still a chance you can find me, one chance
Just one left, decisions were made
When your silence stepped down to show me the way

I might be temporary, you can see the signs
You can get to wondering what it meant when guilty dies
And if you do what I do, stay righteous for the saints
It might just leave you wandering in the dark, she said

Will you keep me safe for long
Don't let me forfeit

What's wrong and what goes on inside this
There's still a chance you can find me, one chance
Just one left, decisions were made
When your silence stepped down to show me the way

I'm embraced when I'm leaving in your arms
I play the part so innocent
Reflections and ghosts and what I fear the most
If I stay, you'll play a part

In what goes on inside this
There's still a chance you can find me, one chance
Just one left, decisions were made
When your silence stepped down to show me the way

Will you still keep me safe, you have one chance
Will you still keep me safe, if you have one chance
