

# Open Road

Parabelle

You're a little soul

You can build a monster up inside of me

And let it go and let it fill the purpose that you saw in my

When I saw her, she was slowly turning

In my head for some time now

And what if your make believe is what will make your heart stop

And what if you fall asleep and never wake up

Take me on the open road

I don't know where it ends or where it goes

Just try not to fight it, just try not to fight it

So take me down the open road

Tell me why you love and how you know

Just try not to hide it, just try not to hide it

You're a little fake

You can't kill the monster that you didn't make

If I could take you away

I could be the purpose that you couldn't shake

What I saw and heard has been slowly turning

In my head for some time now

It's just a little fate

Take me on the open road

I don't know where it ends or where it goes

Just try not to fight it, just try not to fight it

So take me down the open road

Tell me why you love and how you know

Just try not to hide it, just try not to hide it

A new place for your confidence

I never knew it was living here

A new place for your confidence

I never knew it was living here

Now just take me on the open road

I don't know where it ends or where it goes

Just try not to fight it, just try not to fight it

So take me down the open road

Tell me why you love and how you know

Just try not to hide it, just try not to hide it

These memories, they set me free, they set me free

There's no place to hide on the open road
