

# Color

## Paradise Fears

Black and white, frozen in time  
Your lips lying so close to mine  
It was dark but all I could see was color

Everything was fading away  
The night starts turning into day  
I think back, oh I need that color  
All I see is color

I can hear you softly say  
I wont call its a word full away  
Just tonight, but to me  
It feels like color

Holding her for this colored string  
All I felt was everything  
You're still the reason that I cant sleep  
It's your color  
All I see is color

I can see still see you talking to me  
I can still see the air that you breathe  
But you tell me all that you see Is color  
All I see is color

All I see is color

Now and then I still see your ghost  
These are moments I miss you the most  
Someone laughs and to me it sounds like color

Everything was fading away  
The nights done turning into day  
I think back and god I'll miss that color  
I miss your color

I can still see you talking to me  
I can still see the air that you breathe  
But you tell me that all you need is color  
All I see is color  
All I see is color  
All I see is color
