

## Alien Godz

PARADOX

Travelling on the endless road of time  
Creatures with a different DNA, another mind  
From a culture, older than we are  
See the ships invade the earth, arriving from the stars

We saw their force, thousands of years back in time -  
They must be gods!  
Flying around, raising the rocks of the mine -  
It's magic!

Pharaoh's pyramid built on our blood  
Alien technology helped to construct  
Millions of stones moving right to the top  
Should we all believe in alien gods?

On another continent and place  
There are different people, you can see another race  
Building up their town with giant-stones  
Can't believe that human power did this all alone

Who had the force so many years back in time?  
We or the gods?!  
What, if a race, older than all mankind  
Did all this?!

Pharaoh's pyramid built on our blood  
Alien technology helped to construct  
Millions of stones moving right to the top  
Should we all believe in alien gods?

Gray - you could say that I'm a fool, asking all these questions  
Race - you could call me a punk, cause I don't believe in your god, and  
Stay - you could say that I'm a freak, asking, if there's aliens  
Chase - you could call this a shame, but I show you facts you can't explain!

Who had the force so many years back in time?  
We or the gods?!  
What, if a race, older than all mankind  
Did all this?!

Pharaoh's pyramid built on our blood  
Alien technology helped to construct  
Millions of stones moving right to the top  
Should we all believe in alien gods?
