PARADOX

It's breakfast and the TV's on  
He talks, we listen then we're gone  
School's out, the children are at home  
Turn TV truth and power on

The radio, the reports, the media great and strong  
The TV, so powerful, so influential all alone - right and wrong!

We're told we live in freedom-states  
That's not untrue  
To some extent you love your fate  
That's what you should do

We watch TV, believe what's said  
They tell the truth, why use my head?  
When did we stop to ask'em why?  
Since when we're falling for their lies?

The TV - a construct of NSA or the damn FBI?  
Newspapers in China, Korea, do they lie?  
Daredevil dies!

We're told we live in freedom states  
That's not untrue  
To some extent you love your fate  
That's what you should do

Now I think I'll get paranoid  
All, I believed in, seems destroyed  
They tell you, what you need, what's true!  
But can't you see, what's overdue?

When we phone, they bug us, our data made of glass  
The secrets of army and politics should not last  
The die is cast!

We're told we live in freedom states  
That's not untrue  
To some extent you love your fate  
That's what you should  
But total truth would bring conflicts, heavy loadings  
We can believe most of the news  
We're the world's best truth!
