

# Nothingness

## PARADOX

Collapse of existence energy and force  
Uniformity no detectable source  
Elimination of space universe and matter  
Illusions of the universe - scattered

Returning to nothingness  
Revolving into unbeingness  
Expansion and contraction  
Evolving out of nothingness  
Constructing somethingness  
Expansion and contraction to existence

Everything is spinning moving in action  
Mikroscope elements each one a universe  
In constant expansion and contraction  
And just when it's over it all starts again

No thing beginning  
Nothing at the end  
Evolution spinning  
We cannot comprehend  
The beginning of nothing  
Nothing at the end  
Universal mystery  
Transcend

Space is defined through absence of matter  
Matter is defined by absence of space  
The illusion of a final end is shattered  
Infinity is in every element on every place

The human inability to perceive infinity  
To recognize there is no finality  
Every single action serves only one purpose  
To create one total uniformity
