

Some hundred million years ago the giants had their birth  
Super-continental start of unrest on the earth  
Reign of the carnivores, development of brain  
Supremacy of power, find a prey you shall devour

Evolution made its way, survival of the best  
Exterminate the elder ones, the sick and all their rest  
When they are dying out, the predators improve  
Now can't you see the similarity they have with you, and...

All's set in train now there's no holding back  
Life's on its way and that's hard for the prey  
All's set in train and there's no turning back  
Engine will run till the last breath is done

It's the beginning of the end  
The full-devastation-starter  
First step of the rise and fall of man  
Extermination-starter  
Pangea, you're the heart of death

Million years are over now, the mammals got on stage  
Human evolution, book of history turned the page  
We rearrange, we have technology and more  
Just to survive is not the treasure we are striving for, and

All's set in train now there's no holding back  
Life's on its way and that's hard for the prey  
All's set in train and there's no turning back  
Engine will run till the last breath is done

It's the beginning of the end  
The full-devastation-starter  
First step of the rise and fall of man  
Extermination-starter  
Pangea, you're the heart of death
