

# Rising Forces

Paragon

We're coming out at night  
Disciples of true steel  
The virgin flesh we seek  
And bring them all to heel

The Sleeper's wake-up call  
The enemy within  
Standing all for one  
The mass shall now begin

Up from the ground  
From the ashes we'll rise  
Forever we're bound  
With fire in our eyes

And from dark to light we will claim our realm  
We will bring the law - this is our time  
The rising force is here to rule and to reign  
This is the sacred, sacred moment in time

Fate and destiny  
Implanted in our heads  
Ancient legacy  
The truth has to be spread

End our masquerade  
New life beyond the veil  
Reborn for this raid  
We're the science holy grail

You can't resist  
Fall in despair  
Your name's on our list  
And the horde's everywhere

And from dark to light we will claim our realm  
We will bring the law - this is our time  
The rising force is here to rule and to reign  
This is the sacred, sacred moment in time

And from dark to light we will claim our realm  
We will bring the law - this is our time  
The rising force is here to rule and to reign  
This is the sacred, sacred moment in time
