

Leaveyourlove

Parcels

I never want to leave your love
I never want to leave your love
I never want to leave you

I never want to leave your love
I never want to leave your love
I never want to leave you

I never want to redefine
I never want to make you mine
I only want to see you shine
I only want to see you

I never want to read the stars
I never want to heal your scars
I only want you as you are
I only want to see you
You know I never want to leave your love...

I never want to leave your love
I never want to leave your love
I never want to leave you

I never want to leave your love
I never want to leave your love
I never want to leave you

When she calls my name
I feel this way that I can't describe
So alive
When she looks at me, talks to me, it just opens me

Then we go away
I feel the pain coming on strong
On and on
But I can't complain
I am on my way back to her place
I never want to leave your love...

I never want to leave your love
I never want to leave your love
I never want to leave you

I never want to leave your love
I never want to leave your love
I never want to leave you

I love it when you calm me down
Making it easy
It's better now when you're around
You're there when I need it

It's always in my heartbeat now
My head when I'm dreaming
I said that I could live without
But who was I kidding
I never want to leave your love...

I never want to leave your love
I never want to leave your love
I never want to leave you
