Time that passes so quickly
We call it memories
This new start that I'll create with you
I'll call it love
I'll cherish you, I'll fill my eyes with you
You'll be colored with my beautiful color
You're my beautiful flower

I feeling it all the day
I feeling it all the time
All the days I felt with you
I feeling it all the day
I feeling it all the time
I see myself in your eyes
As we're looking at each other
We're longing for each other
I'm following your breath
All of the seasons we shared are so precious

My flower, rose
Always bloom next to me
You're my only love
Let's grow our love
Always stay by my side

I'll go close and knock
You can answer me anytime you want
The scent of a flower
Fills my body
Even when I close my eyes for a moment
I can't ever forget you
Our memories
You're in every breath I take, up all night
How can I forget the first time we met?
As we hold hands even tighter
I wanna feel you, andante
Can't express with words
The drama we wrote together

I feeling it all the day
I feeling it all the time

All the days I felt with you
Ended with a smile
I feeling it all the day
I feeling it all the time
All of the seasons we shared are so precious

My flower, rose
Always bloom next to me
You're my only love
Let's grow our love
Always stay by my side

Longing fills up my empty room
I'm drunk with your scent, I'm thinking of you
I won't say this too lightly
Because I know both of us felt
The same kind of trembling
It's so hard to endure through this longing
I smiled as if we met eyes and confessed
Do you remember?
All the seasons we shared
All the seasons
All the seasons are so precious

My flower, rose
Always bloom next to me
You're my only love
Let's grow our love
Always stay by my side
