

## By The Light

### Parks, Squares and Alleys

It's called love, can you feel something?  
Like you can't get away from it  
By the light you'll know it's coming  
It's called love, can you feel something?  
Like you can't get away from it  
By the light you'll know it's coming

Forget the words, you don't need them  
Or better yet dissolve in this feeling  
(It's so good)  
The world goes round and round  
And every bit of it responds with a sound  
(So you do)  
...

It's called love, can you feel something?  
Like you can't get away from it  
By the light you'll know it's coming  
It's called love, can you feel something?  
Like you can't get away from it  
By the light you'll know it's coming
