

# Alone Like That

Parmalee

Everybody's out here dancing  
Everybody's having a damn good time  
Every song is right on the money  
Yeah its friday night  
You should be spinning like a disco ball  
You should be letting that long hair fall,  
Fall not waiting on him to call

One hand on your phone  
One hand on your glass  
You're at the party  
But you're way in the back  
Alone like that, alone like that  
Yeah I would never leave you alone like that  
Boy musta been crazy  
The one that left you here baby  
Alone like that alone like that  
Yeah I would never leave you  
Alone like that

I know you didn't come out here  
To sit there by yourself  
All shinin' like a diamond  
Baby if you can't tell  
You should be singing at the top of your lungs  
You should be smiling like you're all in love,  
Love but something don't add up

One hand on your phone  
One hand on your glass  
You're at the party  
But you're way in the back  
Alone like that, alone like that  
Yeah I would never leave you alone like that  
Boy musta been crazy  
The one that left you here baby  
Alone like that alone like that  
Yeah I would never leave you alone like that  
Somebody musta made a mistake (made a mistake)

Girl I would never leave you that way

One hand on your phone  
One hand on your glass  
You're at the party  
But you're way in the back alone like that, alone like that  
Yeah I would never leave you alone like that  
Boy musta been crazy  
The one that left you here baby  
Alone like that alone like that

Yeah I would never leave you alone like that  
I know you didn't come out here  
To sit there by yourself  
We could be spinnd like a disco ball you could be  
Letting that long hair fall fall
