

For You

Parmalee

For the good times
For the right and the wrong times
For the hurt in the goodbye
For the you on my mind
Yeah this is for the mistakes
For the making up all day
For the doing what it takes
For everything that I never say

I took my love and I wrote it down
Every single word that I'm singing now
When the lights come on and I see the crowd
Girl I can't help but think about
Spinning you around like a record on a
Sunday morning with your hair let down
Every night that I roll to another town, yeah it's crazy how
Everybody's singing along to a song I wrote for you

For the time I ain't with you
For every highway in between
For the miss you need you neon nights
That you ain't here with me

I took my love and I wrote it down
Every single word that I'm singing now
When the lights come on and I see the crowd
Girl I can't help but think about
Spinning you around like a record on a
Sunday morning with your hair let down
Every night that I roll to another town, yeah it's crazy how
Everybody's singing along to a song I wrote for you

And every time you hear oh, oh, oh
I got you in my arms
Oh, oh, oh no matter where you are

I took my love and I wrote it down
Every single word that I'm singing now
When the lights come on and I see the crowd
Girl I can't help but think about
Spinning you around like a record on a Sunday morning with your
hair let down
Every night that I roll to another town, yeah it's crazy how
Everybody's singing along to a song I wrote for you
Everybody's singing along to a song I wrote for you
