

Down That Road

Passafire

One, two, three...
Pressure skyrocketing
Don't let it cease you now
It's pleasure they're pocketing
Their fingers are reaching out
They say I'm witch doctoring
I say it's easily found
In the misleading marketing
Meant to appease the crowd
Made up my mind
I've been seeing all the signs
I've been trying to avoid them
But it's here before my eyes
And I
Made my decision
To avoid a big collision
With whatever waits for me down that road
I take a left turn and drive it down
Down 'til the wheels fall off
What was public is private now
Gates can't hold me, oh no
Never-ending sacrifice is how
We will achieve these goals
Turn off the limiter and fry the sound

Going to hear me for sure
Made up my mind
I've been seeing all the signs
I've been trying to avoid them
But it's here before my eyes
And I
Made my decision
To avoid a big collision
With whatever waits for me down that road
Get started climbing that ladder
Oh no, yeah yeah yeah
It's growing just as fast as you
Made up my mind
Seen all the signs
Made a decision
With whatever
With whatever
With whatever waits for me down that road
Made up my mind
I've been seeing all the signs
I've been trying to avoid them
But it's here before my eyes
And I
Made my decision
To avoid a big collision
With whatever waits for me down that road
