

# Raise Your Hands

Pat Monahan

Stand up and get ready for what's coming  
Stand up breathe in  
Check your eyes it's about us  
Mother nature don't lie Its about us  
Stand up breath in

There's a place in space the captive like to go  
And I been sleeping on it way to long  
I'm coming home

And if you're tired and waiting for the sun  
Raise your hands  
To shed a little light on everything you've done  
Raise your hands  
If you're stuck under a rock and you want to roll  
I know where to take you if you want to go  
Raise your hands

Now I've been down before and I'll be down again  
And I'll be damned if I wont need a true friend  
Not the kind that's always got to give advice  
The kind with love, I just need someone who's nice to me  
Do you know what its like to be so down that up  
Ain't in sight  
Now if your with me let me see you stand up and raise your hands

And if you're tired and waiting for the sun  
Raise your hands  
To shed a little light on everything you've done  
Raise your hands  
If you're stuck under a rock and you want to roll  
I know where to take you if you want to go  
Raise your hands

I'll carry you, you carry me  
I got to be wrong sometimes  
Teach me how to be strong sometimes  
I'll stand for you, you stand for me  
Oh I know that I can count on you  
Never let the sun set down on you  
I love you

And if you're tired and waiting for the sun  
Reach on up and grab it

And if you're tired and waiting for the sun  
Raise your hands  
To shed a little light on everything you've done  
Raise your hands  
If you're stuck under a rock and you want to roll  
I know where to take you if you want to go  
Raise your hands

I said I know where to take you if you want to go  
Raise your hands  
Come on I know where to take you if you want to go  
Raise your hands
