

Beyond The Space, Beyond The Time

Pathfinder

Deep inside I'm burning she's flying with me
Fly fly to the dark horizon of my dreams
The army of light is fighting together
Fight fight for the astral kingdom to the end

My claws are tearing my tusks are crashing
The flames embraced the skies
And there are no swords
That could force the huge scales of my armor
I spit with sulfur my fire is everywhere
I know, that's the gift from the stars.
Now we are the six
The guardians of peace and the only dragonlords

Beware my brave Dragonlord of the Yearnig Star
We can win but the glory is so far
We have to fight for all astral planes
And the dream is your domain

Even in the far skies I will cover you
Even in your dark dreams
When you fight in my magic be with you
Even in the far land I will cover you
By the drawings on our hands my magic be with you

I got the power for repress my infinite hates
Behind his eyes
Under a white dragon shape
My mental forces belong to an dream's astral plane
But my claws and flames have the real name

We are beyond the space, beyond the time
Where the dreams still meet a reality
We are beyond the light beyond the dark
Where the space-time continuum has its end

Dark shadows are fading and falling to abyss
I know, the Black Lord rules them all
And nothing is lost as long as we gain an air supremacy
The victory is coming I feel it in my heart
We're back to reconquer my land
Now we are the six
The guardians of peace and the only dragonlords

Fall down into your darkest dreams,
Into your darkest nightmare find this god
Which screams inside your mind
And when you'll stand with him eye to eye
Calm the heart and leave your rage behind

I got the power for repress my infinite hates
Behind his eyes
Under a white dragon shape
My mental forces belong to an dream's astral plane
But my claws and flames have the real name

With every transcendental while

My astral dragons die
Here nobody can help you
My priestess calls a magic spell
The army flies ahead
Ars magica ignis aeterni

We are beyond the space beyond the time
Where the dreams still meet a reality
We are beyond the light beyond the dark
Where the space-time continuum
And the wonder of life has its end

I was the witness of your birth and death
And strictly speaking I was the reason of both
You will never escape from your destiny
And that what you were
Come my son stop to dream and face the cruel reality

How could we grow stronger
To ease endless grief
How could we still wonder
We're asking what if

Beyond the space beyond the time
We are flying away
Where the dreams still meet reality
We're asking how could
We grow stronger to ease endless grief

We are guardians of all astral planes
We are fighting to the end of all days
Fight forever even the sun is gone
Might moonlight will not leave you alone fight forever

With every transcendent while
My astral dragons die
Here nobody can help you
My priestess calls a magic spell
The army flies ahead
Ars magica ignis aeterni

Beyond the space we beyond the time
We are beyond the light and the dark

We are beyond the space beyond the time
Where the dreams still meet a reality
We are beyond the light beyond the dark
Where the space-time continuum
And the wonder of life has its end
