

# Mountain of the Dead

## Pathology

Descending upon the Ics as winter arrives  
In Darkness  
They cut from the inside to escape  
The Night

Skin changed to the dark  
Clothes filled with radiation  
Orange lights from the sky  
Fall from north

Mount of the dead  
Fall from north

Hypothermia  
Fractured skulls  
Hypothermia  
And tongue removed

Disorientated from heat loss  
Death has come from above  
As we lye in the north  
Ready to see the other side  
Frozen with fear our lives  
Lost and covered  
From this side to the other
