

Whatever It Will Take

Patrick Nuo

The things that you're saying, they all seem so right
'Cause everything tells me
That you're the one who could turn on this light
To make me see clearly
But every time you walk away so straight
I can only say so long
It's so very hard to keep my faith
And make you mine before it's much too late

I'll give you something that can take you so far
Let's get it on just to get into this thing
That can take us so far
Let's get it on

Every little thing within your face
Tells me all about your soul and grace
But every little thing could bring me down
If I couldn't make you stick around
Whatever it will take to hold you
I'm gonna give it all to
Break through to you

There was no such thing I've seen in my life
'Cause nothing else got so close to my heart
And it makes me feel right
That's everything I know
I try so hard just to keep the faith
To make you mine before it's much too late

I'll give you something that can take you so far
Let's get it on just to get into this thing
That can take us so far
Let's get it on

Every little thing within your face
Tells me all about your soul and grace
But every little thing could bring me down
If I couldn't make you stick around
Whatever it will take to hold you
I'm gonna give it all to
Break through to you
I'm gonna give it all to you

I'll give you something that can take you so far
Let's get it on just to get into this thing
That can take us so far
Let's get it on

Whatever it will take to hold you
I'm gonna give it all to
Break through to you
Whatever it will take to hold you
I'm gonna give it all back to you
Break through to you
I'm gonna give it all back to you
