

# Town Called Heartbreak

Patti Scialfa

They say love  
Love has it's very own light  
That can shine thru the darkest night  
That we've heard of  
And that light  
That you may want so much  
Well maybe you can never touch  
Though you may try  
Now at night I dream  
I'm all alone  
Big sledge hammer and a cold dark stone  
Man swing the hammer  
World begin to shake  
I'm just living in a town called Heartbreak

Now Eve  
She stood my Adam's side  
Somewhere in paradise  
When the world was young  
And their love  
That was so pure and sound  
Was cursed straight into the ground  
That they walked on  
Now somewhere in every kiss  
I still feel the blame  
Like a dirty link  
In a long dark chain  
Man pull the chain  
World begin to shake  
I'm just living in a town called Heartbreak

You've got to work with me baby  
You've got to work with me baby

She says "man"  
I've given you my flesh and blood  
But that just wasn't good enough  
You wanted my soul  
He says "girl"  
No matter how hard I try  
You just ain't ever satisfied  
Oh no no no  
Now at night the same dream  
I'm all alone  
Big sledge hammer and a cold dark stone  
Man swin the hammer  
World begin to shake  
I'm just living in a town called Heartbreak

You've got to work with me baby  
You've got to work with me baby
