

Drive

Patty Smyth

I found a picture of us when we were kids
We're out in a field behind where we used to live
I'm chasing you chasing him in a faraway dream
We're running in grass that's so tall, we can barely be seen

Come out with me, let's go back in time, let's drive
All of the years in between just let them fly by
Under the arc of the sky I won't let go
Under the summer trees I loved you so

We're lying side by side all alone in the dark
Afraid of the sounds in the house a telltale heart
So, you're telling stories of places to take me away
And I'm singing songs that we learned as the radio plays

Come out with me, let's go back in time, let's drive
All of the pain that you've had just leave it behind
Under the arc of the sky I won't let go
Under the grandfather trees I loved you so

Oh, let's drive, oh let's drive...

We were young, we were free, ruled the world, you and me...

I remember everything, everything you said to me
And I would never be afraid as long as you were next to me
I remember everything, all the things you said to me
I would never be afraid as long as you were next to me

We were young, we were free, ruled the world, you and me
