

Love To See You

Paul Baribeau

I would love to see you but I live so far away

There are certain notes on a piano that remind me of your voice
But maybe that's just my runaway imagination
Maybe I should just take some of my own advice or at least my m
edication

There's a lonely song on the radio that reminds me how much I m
iss you
But I don't really listen to the radio these days
I can't even remember the last time that I kissed you
But it shouldve left me breathless yeah totally amazed yeah
