

# Always Have, Always Will

Paul Carrack

If you're wondering if your love  
Will stand the test of time  
I'm here to tell you I can put your mind at ease  
Ain't nothing in the whole wide world that could ever make me leave

How could I ever walk away  
Darlin' I need your love each and every day

Always have, always will  
If you should ask me do I love you still  
Without shame without blame  
I always have and always will  
I always have and always will

I remember, there were times  
When my heart could not conceive  
Something so beautiful would happen in this life  
A precious gift to me worth and sacrifice  
There is no doubt or mystery  
It's obvious that you mean everything to me

Always have, always will

It was almost like your heart called out my name  
I was helpless from the start  
I knew right there and then I'd never be the same  
Never never  
I'd never be the same
