

These Days

Paul Carrack

These days won't come back
We're just passing through in our lives
On a one way track
We take the path we've always shared
And travel with the light of love
Shining everywhere

As we walk beyond these days of youth
We're all passing by [?] inspired truth
As we say goodbye to the ones we love
Without knowing that we're all passing through

That's all we can do these days
We'll not pretend
The dreams we have still survive
But I have learned
To eat them up like apple pie
We all need some, up in the sky
As we feel the summer start to fade

We reminisce and time just slips away

These precious days
These days
These days

I used to think we would live forever
All these precious days I travel
Memories locked in the back
For these days I'd give my thanks

These days won't come back
I'm still learning who in my life
I still have to thank
For all this love I feel inside
We only have a given time
To realize

As we walk away from the truth
We're all passing by [?]
It's fireproof

These days, yeah
These days
These days
These days
