

## Sure Got Me (Where You Want Me)

Paul Kelly

You've had your eyes on me for quite a while  
I know 'cause I've been checking from time to time  
But you've been with him and I've been with her  
There's been nothing that we could do  
Until you made your move  
You turned away from him and went outside  
Your glance across the room said the time is right  
I walked away from the talk and the laughter  
Felt the need for some air  
And you were right there underneath the stairs  
You sure got me where you want me now  
And that's where I want to be  
You sure got me where you want me now  
And that's where I want to be

Your touch is giving me thrills up and down my spine  
Your sweet and sticky kisses are holding me tight  
We really should get back inside to the party  
They'll be missing us there  
And if we hesitate now, it's gonna be too late  
You sure got me where you want me now  
And that's where I want to be  
You sure got me where you want me now  
And that's where I want to be

I don't care what's right or wrong  
We can't stop what's going on  
I don't care what's right or wrong  
The whole world knows what's going on  
You sure got me where you want me now  
And that's where I want to be  
You sure got me where you want me now  
And that's where I want to be
