

## The Kiss Of Venus

Paul McCartney

The kiss of Venus has got me on the go  
She's scored a bullseye in the early morning glow  
Early morning glow

Packed with illusions, our world is turned around  
This golden circle has a most harmonic sound  
Harmonic sound

And in the sunshine where we stand alone  
We came together with our secrets blown  
Our secrets blown

Now moving slowly, we circle through the square  
Two passing planets in the sweet, sweet summer air  
Sweet summer air

And in the sunshine where we stand alone  
We came together with our secrets blown  
Our secrets blown

Reflected mountains in the lake  
Is this too much to take?  
Asleep or wide awake?  
And if the world begins to shake  
Would something have to break?  
We have to stay awake

Packed with illusions, our world is turned around  
This golden circle has a most harmonic sound  
Harmonic sound

And in the sunshine where we stand alone  
We came together with our secrets blown  
Our secrets blown

The kiss of Venus has got me on the go  
She's scored a bullseye in the early morning glow  
Early morning glow
