

Step Outside

Paul Wall

Step outside and forget what its like to live in the dark
Unwind oh woah
Stars in the sky
Never fall they just stay where they belong
They shine if you step outside

Can't wait to step outside though
I be up until the sun come up but still not tired though
I been inside that's what I've been quiet for
So long but so long to that its time fool
Need to make some noise let this sunlight shine more
Off top no longer gotta sneak though the side door
Side hustle stacking up bread that's a side note
On that note on the boulevard imma drive slow
Eye for an eye let bygones die slow
Or maybe I should turn the cheek and just live life more
I'm just tryna do me and stack up my dough
Why boys wanna talk down I don't know
It's hard to make a meal ticket with your mind close
So open up alarm clock woken up
Put the kush down boy you're choking up
Step outside and let the sunlight soak him up

Step outside and forget what its like to live in the dark
Unwind oh woah
Stars in the sky
Never fall they just stay where they belong
They shine if you step outside

Step outside and let my mind free
These four walls cannot confine me
The devil moving blindly negativity behind me
As I walk into this vocal booth
Turn it up rewind me
No longer comfy in my comfort zone
Closed mouths don't get fed
I make my hunger known
My youngest is grown and we come from moving tons a stone
Running home after dumping chrome
I got a lot shit on my mind but it be deeper than raps
She say she love me but I be knowing that its deeper than that
I drink my liquor to the face and smoke my reefer in packs
Got some demons in my mind and they be keeping me back
I tend to think about my life when its just me on my own
Early morning I can't sleep I be deep in the zone
Thinking bout my bro he caught a L for letting metal fly
I'm praying God will bless the guys its time for me to step outside

Step outside and forget what its like to live in the dark
Unwind oh woah
Stars in the sky
Never fall they just stay where they belong
They shine if you step outside

Vision blurred I can't cry up in the church
I just wanna go outside
Nowadays its the worst

Man I used to crowd surf
Get up spit a wild verse
Feeling like I'm Pac gone born fist
About to burst
Dappin up every fan standing in the front row
Drinkin straight from the bottle
Pour a fan a lil more
20 thousand in the crowd ain't nobody wearing masks
Ain't no shortage on your coins everybody spending cash
Now we in the after party
20 people in the lab
Everybody passing Ls different hands in the bag
Shorty got the fattest ass now she wanna take my math
I just signed an autograph
Feeling like I'm in the draft
Hoppin out the tour bus cannons pass, cameras flash
Grinding hustling and rhyming chasing Nick Cannon cash
I'm just tryna get the bag hit the ave in the slab
God is great and I'm grateful for everything I have

Step outside and forget what its like to live in the dark
Unwind oh woah
Stars in the sky
Never fall they just stay where they belong
They shine if you step outside

Step outside
It'll get you high
And you step outside
