

# We Are One

Paulini

(We are one)

There's a whisper in the wind  
It's the song of planet earth  
I felt it touch my skin  
When I was just a girl  
Barefoot in the sacred sand  
That message came so clear  
Like a ray from the burning sun  
But I felt no fear

Every breath  
Every touch  
Every smile  
Every tear  
Is all heaven sent  
Every woman  
Every man  
Every baby child  
Is born innocent

We are one  
We're the children of the universe  
We are one  
We're the moon, we're the stars, we're the earth  
We are one  
Love is a light shining bright as the sun  
We are one  
We are one

We are one  
Love is the tie that binds us altogether  
We are one  
Without love there wouldn't be a forever  
We are one  
Love is a light shining bright as the sun  
We are one  
We are one

Now I have come of age  
There's a gift I have to share  
To sing the song of planet Earth  
The answer to my prayer

We are one  
We're the children of the universe  
We are one  
We're the moon, we're the stars, we're the earth  
We are one  
Love is a light shining bright as the sun  
We are one  
We are one

We are one  
Love is the tie that binds us altogether  
We are one  
Without love there wouldn't be a forever

We are one  
Love is a light shining bright as the sun  
We are one  
We are one

There's a whisper in the wind  
It's the song of planet earth  
I felt it touch my skin  
When I was just a girl

We are one  
We're the children of the universe  
We're the moon, we're the stars, we're the earth  
Love is a light shining bright as the sun  
We are one  
We are one

We are one  
Love is the tie that binds us altogether  
Without love there wouldn't be a forever  
Love is a light shining bright as the sun  
We are one  
We are one

We are one  
We are one one one  
We are one yeah  
We are one one one  
We are one  
We are one
