

## Gen Strange

Peace

How do you do it? How do you know  
To keep on walking when there's nowhere to go?  
The man on the news, he said "Try not to be scared  
Blood, Love and Terror. Next the Weather"

Generation strange's general ache and pain  
Is pressure from the weight of all the satellites in space  
But you never let it crush, even when you should  
Tell me how you do it, how do you do it so good?

How do you do it?  
How do you do it?  
How do you do it so good?

How do you do it?  
How do you do it?  
How do you do it so good?

The man on the moon looked down to a surprise  
Earth wasn't round it was a square in disguise  
He looked to the stars and saw chocolate Mars  
And poor Venus a razor blade, Saturn a Sega game

Generation strange's general ache and pain  
Is pressure from the weight of all the satellites in space  
But you never let it crush, even when you should  
Tell me how you do it, how do you do it so good?

How do you do it?  
How do you do it?  
How do you do it so good?

How do you do it?  
How do you do it?  
How do you do it so good?

Aching aching everywhere  
Do it effortless with charm and gab  
Sticky fingers, bone and flab

How do you do it?  
How do you do it?  
How do you do it so good?

Generation strange's general ache and pain  
Is pressure from the weight of all the satellites in space  
But you never let it crush, even when you should  
Tell me how you do it so good
