

Power

Peace

I got the power
I know it's true
I got the power
And I feel it in you

Hey, wake up and smell the lavender
Of my flower power, technicolour massacre
Just roll into your ends
Dismembered all your friends
Baby soak in glory
It's the morning you ascend

Cause I got the power
I know it's true
I got the power
And I feel it in you

What's your big idea of paradise?
Some diamond dusted, patent leather, love divided
I swallow all your fear
I whisper in your ear
I can lick my lips and make the darkness disappear

Cause I got the power
I know it's true
I got the power
And I feel it in you

Cause we both wear feathers
In a wad of glue
Draped in leather
We got the power
I know we do

I got the power
I know it's true
You got the power
Yeah, I feel it in you
We got the power
We got the power
We got the power
We got the power
I know we do
