

# Favourite Person

Peach PRC

(My favourite person)

I try not to compare a teenage love  
Cause I know that isn't far or close enough  
But why can't I just shut up?  
I'm always going on about you when I'm drunk  
(You while I'm getting drunk)

And I see your name in every number plate  
I tried to erase your face but you're there everyday

You're my favourite person  
I have created a version that hurts less  
I had to tell myself you're toxic  
Better off cause you're the problem  
Really I just couldn't take it being hated by my favourite person  
My favourite person

Picture vows at a stand in something blue  
I try to fall but I can't cause they're not you  
I hate that I'll never stop  
Thinking that we're not still home growing up

And I hear your tropes in all my stupid jokes  
I'm starting to lose all hope of ever letting go

You're my favourite person  
I have created a version that hurts less  
I had to tell myself you're toxic  
Better off cause you're the problem  
Really I just couldn't take it being hated by my favourite person  
My favourite person

And if the world was ending  
I know I'd be spending  
My last day pretending we were fine  
When we both grow old with families of our own  
Well we always go back in my mind

And I see your name in every number plate  
I tried to erase your face but you're there anyway

You're my favourite person  
I have created a version that hurts less  
I had to tell myself you're toxic  
Better off cause you're the problem  
Really I just couldn't take it being hated by my favourite person
