

Loved You Before

Peach PRC

I bet we were a couple bugs just slithering in the mud
Happily in love doing bug stuff
I think I met you in a store in 1944
I probably wrote you letters while you went off to the war
And we could've been two birds, now wouldn't that be so absurd
Or maybe just lost lovers that keep getting rediscovered

I think I loved you before back when we were dinosaurs
I wanna stay in love in this life and the next one
I think we've already met somewhere, another planet
I wanna stay in love in this life and the next one

I, I loved you before
I, I loved you before
I, I loved you in this life and the next one

Maybe you left me on a trip, two pirates on a ship
Counting all the gold as the boat tipped
Could we have been there drinking wine in medieval times?
Laughing in a castle with our glasses intertwined
Two complementary colours
The winter, the spring and summer
Forever just lost lovers that keep getting rediscovered

I think I loved you before
Back when we were dinosaurs
I wanna stay in love in this life and the next one
I think we've already met
Somewhere, another planet
I wanna stay in love in this life and the next one

I, I loved you before
I, I loved you before
I, I loved you in this life and the next one
I, I loved you before
I, I loved you before
I, I loved you in this life and the next one

If I'm the sun, then you're the moon
In this life and the nights too
If it's over soon then come back through
Just to say, say I love you

I think I loved you before back when we were dinosaurs
I wanna stay in love in this life and the next one
I think we've already met somewhere, another planet
I wanna stay in love in this life and the next one

I, I loved you before
I, I loved you before
I, I loved you in this life and the next one
I, I loved you before
I, I loved you before
I, I loved you in this life and the next one
