

Piper

Peach PRC

When I hear the piper in the trees playing
I know that it's time for me to leave
Staying here kills me
But the sun is gone
And I love this song

Dance entranced
Hear the panpipes play
It's happening
And it's like paradise here
And now I can never leave, I fear

We move, I let it take me over
And try to make it home alright
I beg, against my own volition
To let me stay another night
Piper, don't you bite?

Dance entranced
Hear the panpipes play
It's happening
And it's like paradise here
And now I can never leave, I fear
