

# Never Destination

Pearl Jam

Blisters on my fingers, blisters on my brain  
Blisters on the voices, crazy makes insane  
There's an angry sea, an ocean in my eyes  
The waves are rolling, I'm becoming blind

I won't be taken, won't take myself  
Kicking and screaming, have to knock me off the shelf  
Feels like illusion, is this taking place?  
Disease of confusion, stripped of our grace

Don't wanna believe it, these endless miles  
Never destination, just more denial  
More denial!

Some resolution, some justice tied  
To this collusion hiding in plain sight  
Say see-ya later, never say goodbye  
This is a little trick I play on my own mind

I am a recluse in search of new friends  
Are they gonna find me back where the road ends?  
Off in the distance, leviathans  
50 foot and breaking on our innocence

Don't wanna believe it, these endless miles  
Never destination, just more denial  
More denial!

I can't believe it, these endless lies  
Never destination, just more denial  
More denial

When you make the drop, the gaping maw  
When you make the drop, the gaping maw  
Makes us alive, should we survive  
When you make the drop, the gaping maw  
Keeps us alive, survive  
When you make the drop, the gaping maw

Thank you Bob Honey, thanks Paul Theroux  
If I ever die, then to this place let me go  
Off in the distance, leviathans  
50 foot and breaking on my innocence

I won't be taken, won't take myself  
Kicking and screaming, have to knock me off the shelf  
Say see-ya later, never say goodbye  
This is a little trick I play on my own mind

Don't wanna believe it, these endless miles  
Never destination, just more denial

She was a singer in a rock-n-roll band  
Had command of all her voices  
Turned herself into a hologram  
It all came down to choices

So I say 'til then, never say goodbye  
A little trick I play, on my mind
