

I say hey what's up hello, to my demons
Go figure, go figure, go figure
Broke your heart, now ya thinking bout leaving
Go figure, go figure, go figure
I'm not the same as I was the other evening
Cold widdit when you left me in the distance
Hard times, got me thinking bout love a little different
Hard to find solace in the middle of the friction

This verse starts where our conversation ended
Got some unresolved feelings
Bout all the lack of the attention
I get it
If temptation was an apple I bit it
Giving girls the same time
As me and you should be spending
Tell me jared
You don't see why I act pressed
Like performing VIP you give em all the access
Used to see whats on your heart like a girl with a flat chest
But now I only see you when we lay on that mattress
Made fallback
But I can't fallback
So I match you energy fight back
But you can't life so we might come back
Now we playing games and I'm up at bat
Play ball
Ever since ya balling like it's playoff
No points just tears
You almost took the day off
Til we came together
To make it more lovely
But if you do me wrong, I'll do you ugly
(I'm just kidding. I won't)

I say hey what's up hello, to my demons
Go figure, go figure, go figure
Broke your heart, now ya thinking bout leaving
Go figure, go figure, go figure
I'm not the same as I was the other evening
Cold widdit when you left me in the distance
Hard times, got me thinking bout love a little different
Hard to find solace in the middle of the friction
