

Morning Light

Pell

Arrived in a school bus but it wasn't yellow
And if you show a few bucks we can ride together
Get it lost, smelling like I sat by the exhaust
I'm taxing because the gas that I'm sharing is ethanol
Virgin to what I'm serving, them brothers can't hit at all
Her feelings with what I really told them to laugh it off
Found my conscience in the condom while taking my jacket off
But I mend it before the seasons, I spring her before she fall
Costco where my feelings left, shopping for her sentiment
I rode her in and out but never to rekindle it
We drunk, I can't remember it, so sorry for embarrassment
You'll never find better, ain't no sense comparing it
Got work in an hour but you wanna stay longer
Covers wrapped around you, that's the only thing on you
Yupi-ka-yey, let you ride it all summer
Then we go our separate ways fantasizing about the moment
Yeah, fantasizing about that
Yeah, fantasizing about that
Yeah, fantasizing about the moment

And I stay right by your side tonight
Until we both see the morning light
And I know that all we did was gone
But baby girl, I just can't get enough of your love
Of your love
Of your love
Of your love

Getting lost in thought, mimicking the covers
Getting drenched in sweat, girl, you smooth as butter
Took a chance with romance, I'm the lucky number
Accepting is a challenge but denying is even tougher
So now we in a phase where anything could change
Like any sudden movement is a danger to my game
I would leave it open-ended but you scared to take the reigns
So I'm going for the distance, shoot for six like Reggie Rain
Take your time, I won't complain, we need to breathe again
And the way I chopped to school you'd swear I made the remix
Seen you in my fantasies but girl, you flew from Phoenix
Just to make a little money working at the cleaners
Goddamn, cold world but it's warm in the bed
You think I'm crazy, I should stop while I'm ahead
'Cause my curiosity has got the cat between my legs
And I know that you just wanna hear me beg so listen up
Just listen up
Yeah, just listen up
Yeah, I ain't had enough

And I stay right by your side tonight
Until we both see the morning light
And I know that all we did was gone
But baby girl, I just can't get enough of your love
Of your love
Of your love
Of your love

Sucker for my face, you've been sucking it for days

Know that I'm exaggerating
Still in second place to the music that we make
See the truth when we lay naked
I know, feeling good vibrations
Let to go your inhibitions
Run off, tell your girlfriends you'll be late
They tell me time is precious so let's not waste it
Let's not waste it
Let's not waste it
