

Technicolor

Pell

I keep running thru the city many faces that I see are like walls
Got my mind up on a mission wont be slipping thru the cracks and pitfall
It'll leave you blind within all the lights
But I see the technicolor thru the black and white

I can see clearly now the bullshits gone
The future's bright I'm doing fine (yeah)
Keep my head straight though
I don't wanna get blinded by those silly lights yeah
But tell me where you wanna go (go go go)
Baby I can make it happen yeah
I just might buy a boat
Fuck around and make you the caption
Oh, damn, just like that
Just like that I got you
Ooh shit
Just like that
Just like that I'll drop you
Now I'm riding through the city
Tryna find a bitty
All this black and white damn I need some color
Now I'm riding through the city
Tryna find a bitty
All this black and white damn I need some color

I keep running thru the city many faces that I see are like walls
Got my mind up on a mission wont be slipping thru the cracks and pitfall
It'll leave you blind within all the lights
But I see the technicolor thru the black and white

Always knew I wasn't on the page
As everybody else
Lately I been running at my own pace
Keeping up with myself
It get so hard
To stay focus
Painting pictures with the stars
Maybe I can show you
Maybe I can take you there

I keep running thru the city many faces that I see are like walls
Got my mind up on a mission wont be slipping thru the cracks and pitfall

It'll leave you blind within all the lights
But I see the technicolor thru the black and white
