

Silent Spinner

Pendulum

I hope you're sitting down cause this wheel is spinning around
It's making me dizzy and I can't remember what for
Make it a hundredfold, the new beats are getting old
Got me in a stranglehold, it's never enough, never enough
Blame my chemistry, you saw another part of me
One thread of the tapestry, a hard act to follow
Nothing you could say, can make me want to stay
Knives so hollow, it's never enough, never enough

If you want it, then lights out, make your way home

You got the power, the voices getting louder
Screaming about, you're wearing me out, come closer
Never satisfied, saviour to the wildlife
Hand in hand cause it's never enough, never enough
You're getting restless, and all I can suggest is
More of the same, no-one's to blame, something's gotta give
As far as I can see, machines and apathy
Chasing the dragon, it's never enough, never enough

If you want it, then lights out, make your way home

I don't wanna fight, for a feeling that burns tonight
If we're at the end, then I can't pretend anymore
One after the other goes, don't say you didn't know
We'll punish the victim, it's never enough, never enough
We need a reason, first to come, it's the season
Take of your head and the world keeps turning
If you get out alive, just know that I tried
Turn up the lights 'cos it's never enough, never enough

If you want it, then lights out, make your way

If you want it, then lights out, make your way home
