

Predator

Pentakill

You are no different, you're animals
You are but momentary flaws
You are a dying world
We are your death reborn
Welcome to your new reality
Silence the weak morality
We bring a lifeless existence
We're seeking to end it all
Lifeblood of this World

We are ghosts of old
Will of stone
Buried omens
Pray to our shadows

Brought to your knees we are your demons
Too far we've come to spare your ways
From distant skies we've seen your treason
So look beyond and witness pain

You are inferior, you're fallible
You are just temporary souls
You are just simple forms
We are your death reborn
We bring fire
We bring pain endlessly
Make good with death
Morality
We're children of soulless dead entities
We, the lifeless of this world

We are ghosts of old
Will of stone
Buried omens
Pray to our shadows

Brought to your knees we are your demons
Too far we've come to spare your ways
From distant skies we've seen your treason
So look beyond and witness pain

From distant skies
And witness this shock

You are no different, you're animals
We are your death reborn

We are ghosts
Who break all life
Buried omens
Pray to our shadows

Brought to your knees we are your demons
Too far we've come to spare your ways
From distant skies we've seen your treason
So look beyond and witness pain

From distant skies
And witness this shock
Shock
