Redemption

Pentakill

Oh, oh
Yeah, yeah

To the edge of death and back again
We've seen the walls come down
But here we all still stand

We are the flame within lights our final breath
They try to extinguish us
We are timeless in death

Hear the awakened world
Scream glory and scream courage
For here we stand in the path of victory

We made it through fires to redemption on the other side
We're standing and we're burning bright
Oh, right!
'Cause we are timeless
Our future knows not your pain
Our past knows only victory
So we still remain

Oh, yeah, yeah

To our last free breath and back again, mm
We've seen our skies burn red
And seen them turn to flame

We are the fire that guides our destiny, yeah
They tried to finish us
We fight until the last

Hear the awakened world
Scream glory and scream courage
For here we stand in the path of victory

We made it through fires to redemption on the other side
We're standing and we're burning bright
Oh, right!
'Cause we are timeless
Our future knows not your pain
Our past knows only victory
So we still remain, yeah

Oh, come on
Yeah

How many came to fight and die here?
How many legions overcome?
How many scars are left behind us?
But there will be new horizons
There's always life within us

Hear the awakened world
Scream glory and scream courage
For here we stand forever from this day

We made it through fires to redemption on the other side
We're standing and we're burning bright
Oh, right!
Cause we are timeless
Our future knows not your pain
Our past knows only victory
So we still remain
And we still remain
