

# Dancing On The Moon

Pepper

When she calls me  
It's at night all alone  
And if I'm lonely  
I'll pick up the phone  
'Cause we know we're going to the ivory stone  
And when she's shining, I'm not staying home

And me and you together  
Just dancing on the moon  
And get into whatever  
We're dancing on the moon  
And me and you together  
Just dancing on the moon  
And we could live forever  
Dancing on the moon

In the morning  
I woke up on my own  
And found a message  
Which the sun had shown  
The world looks better  
From the ivory stone  
I'll see you later  
Lejos del sol  
I am home, home  
I am home, home

Me and you together  
Just dancing on the moon  
And get into whatever  
Dancing on the moon  
Me and you together  
Just dancing on the moon  
And we could live forever  
Dancing on the moon

Your gravity draw you closer to me  
Now a pure agony when you wind up your body  
A Just the Pepper and the big voice  
Girl you know the time  
The energy between us girl you just can't deny  
So just dance for me out by the pale moonlight  
Dance for me 'cause your know your future so bright  
When you dance for me then me see the joy in your eyes  
The rudeboy is the keys to your life

Me and you together  
Just dancing on the moon  
And get into whatever  
Dancing on the moon  
Me and you together  
Just dancing on the moon  
And we could live forever  
Dancing on the moon
