

On the Outside

Pepper

I'll see you on the outside, and we'll never be the same
After all that's happened, what is it that we've gained?
I've made mistakes before and never lived them down
After all you've done for me, I'm bound
Don't say another word

To see you on the outside where we can both be sane
You're speaking for yourself
I'm bleeding on the inside, a place you might have been
But now I know I'll never be the same

And I heard you got a new place and it's far away from here
Reality has sunken in now, confirming all my fears
I'm not gonna track you down, but it's too late to stop
Thinking 'bout the time that we have lost
And I'm happy without you

I'm trying to forget you and everything we had
We didn't stand a chance
We're miserable and it's true, we haven't learned a thing
But now I know I'll trust no one else

There was a time when we were back and forth, it wasn't easy
I guess we're back where we belong
One thing is for sure, it wasn't strong

I'll see you on the outside where we can both feel shame
You've never been more right
I'm dying on the inside, you're never coming back
And now I know whatever we go through
My heart is stuck with you

My heart is stuck with you
My heart is stuck with you
My heart is stuck with you
My heart is stuck with you
My heart is stuck with you
My heart is stuck with you
