

Sugar

Pepper

Come on baby come on
When it's time for the sugar
Come on baby come on
When it's time for the sugar

I like the way you move
I like to watch you groove
I think I need a drink
Throw you up on the bathroom sink
And get these clothes removed
Did I ever mention my reflections not the same
Guess things will be rearranged
Ready from the introduction
Lyrics laced with seduction

You know just what to do
With all those sneak previews
Into some touching
With no interruption
Into the sweetest taboo

Playing hard to get
And baby it's a mystery
Is your mind made up on fucking me
Yes it's time I do believe
To break you off and get sugary
Look at the girls them dancing
Sexy body keep winding
Look at the girls them dancing
Sexy body keep winding
Slip around the corner
When the club gets hot
X amount of liquor spilling from the top so

Come on baby come on
When it's time for the sugar
Come on baby come on
When it's time for the sugar

All of these women in here
So drunk they don't even care
And I love it when they get wild
And they start pulling on my hair

I seen her at the club last night
It's something about her aura that's right
She don't even play by no rules
Make me feel like I'm on shrooms

Look at the girls them dancing
Sexy body keep winding
Look at the girls them dancing
Sexy body keep Winding
Slip around the corner
When the club gets hot
X amount of liquor spilling from the top so

Come on baby come on
When it's time for the sugar
Come on baby come on
When it's time for the sugar
Come on baby come on
When it's time for the sugar
Come on baby come on

Arriving at the corner
I guess it wouldn't last
You think you could see me
You couldn't move that fast
And that's why no one's around
It's just sound, it's just sound

Arriving at the corner
I guess it wouldn't last
You think you could see me
You couldn't move that fast
And that's why no one's around
It's just sound, it's just sound

Do you remember?
Do you remember when I was
Standing on the corner
I'm standing on the corner

What you say

I'm standing on the corner
I'm standing on the corner

What you say
