

Tides

Pepper

He's beating his chest, he thinks he's the best
But we're down on the beach and she's making me sweat
Your lipsticks a mess, it's time to get dressed
We are seconds away, I'm about to confess

I don't want to be like that no that's not who I'll be
I don't want to live like that but she's keeps making me

You come over get me high leave me low
My love keeps drowning in your tides
Just a midnight lover, red flag undertow
My love keeps drowning in your tides
Under the moon lost in your eyes
I'm falling for you in those dashboard lies
Pull me closer get me high leave me low
My love keeps drowning in your tides

I see your silhouette, hair is still wet, dancing in the firelight
Love the way your body moves, when you're in the groove
Know it's wrong but feels right
I just want to drink you down even just to find out, if one drop will bring me death
I need to know if you'll rescue me when I'm gasping for my last breath

You come over get me high leave me low
My love keeps drowning in the tides
Just a midnight lover, red flag undertow
My love keeps drowning in the tides
Under the moon lost in your eyes
I'm falling for you in those dashboard lies
Pull me closer get me high leave me low
My love keeps drowning in the tides

You come over get me high leave me low
My love keeps drowning in your tides
The midnight lover, red flag undertow
My love keeps drowning in your tides
Under the moon lost in your eyes
Falling for you in those dashboard lies
Pull me closer get me high leave me low
My love keeps drowning in your tides

Drowning in the tides
Drowning in the tides
