Pestilence

The thought that this forever
Is really happening now
Even with the mutual endeavour
To protect us and know how

When all of us fail to cure
The insanity that comes from within
That we are engulfed in darkness
Leaving us with bones and skin

This pain will never go away
If you let the external prey
Causing your feeble soul to stray
Mass extinction with no delay

Solo: Mameli

The truth in finding answers
Lies truly within ourselves
We create our own cancers
Leaving our rationality on shelves

This darkness only can exist
If we empower it so it can be
Only then we can have it dismissed
So that we then truly can be free

This pain will never go away
If you let the external prey
Causing your feeble soul to stray
Mass extinction with no delay

Free from desire,
Free from hate
Free from the fire
That is called SIN

Solo: v. Noordenburg
