

She's got it - all my dominos are falling down now
Your rocket - came storming into town
And blew me down
You didn't even know

Your fever - was warmer than I could ever be
A believer - was what you made my life to feel in time
You know you'll never go

And I want you to stay with me tonight
Just don't go back
To black and all the demons that you fight
Let it roll on by

You got it - your voice flies me to the moon now
Time stopped it - and will not allow you to
Grow old tonight
But you know you'll never go

And I want you to stay with me tonight
Just don't go back
To black and all the demons that you fight
Let it roll on by

She's got it - all my dominos are falling down now
Your rocket - came storming into town
And blew me down
You didn't even know

And I want you to stay with me tonight
Just don't go back
To black and all the demons that you fight
Let it roll on by

You got it
You got it
You got it
You got it
